

# GCS HOTSPOT

GCS provides the hospitality industry's most reliable, and easily deployed high-speed wireless Internet solution at the best, bundled all inclusive price guaranteed. With no up-front or hidden costs, no long term contracts, and no secrets, it's no wonder that GCS is proudly trusted in more than 100,000 hotel rooms.

## Simple, Reliable, Problem Free

GCS does things a whole lot different than providers of the past. We don't use costly servers located in a corporate tower. These expenses would just get passed on to the customer -

not anymore. We use the next generation of mesh node technology allowing you to extend your wireless internet connection to 100% of your property without the need to run wires Or electrical. No wires, no construction, no down time. With the GCS promise, you will get simple, secure, and problem free wireless....guaranteed.

## We cover every room.....GUARANTEED

GCS specializes in commercial wireless for hotels, resorts, campgrounds and pretty much anywhere a guest might stay for any length of time. We all know how important internet is to your guests...right? You may have been told that you can't get wireless to this area or that meeting room etc. because of the layout and concrete construction

your hotel.....not a problem, with our professional installation technicians and our technology we go right through concrete steel construction for 100% coverage in every room.

## **Free system, install and 24/7/365 technical guest support**

Is you front desk staff getting frustrated?

Would you rather be paying them to help your guests instead of dealing with internet issues and complaints? We offer 24/7 toll free guest support with our highly trained certified technicians. This allows us to take care of all your internet issues leaving time for your staff to do what they do best. In addition, we also

offer free systems and install all included in one bundled price. Not convinced yet? We are so confident in our product and service we offer a 30 day no obligation free trial! Too good to be true right... Try us, what do you have to lose... it's guaranteed!

## **FREE LIFETIME SOFTWARE AND HARDWARE UPGRADES**

With GCS we make sure that your investment never gets outdated. With technology constantly changing you can let GCS worry about the cost of upgraded equipment and software as it comes available so you and your guests can stay online and fast with the latest technology. Most providers only offer one low performance, cheap router for every install but GCS has specialized hardware and software for coffee shops to small cities. We even have the latest "N" technology to future proof your system.

## **GUEST SUPPORT \$2 PER MONTH, PER ROOM-UNBEATABLE!**

### **YOU SET THE PRICE**

With GCS you have the option of giving internet for free or charging your guests. You set the price, keep the revenue and your customers. It is easy to setup and collect payments with our built in credit card payment software.

### **BANDWIDTH MANAGEMENT**

GCS's management system allows you to control the amount of bandwidth to each of your guests to make sure all of your guests get an equal share of the bandwidth. We are also able to block users from illegal downloads including movies so your guests can't bypass sales of your in room entertainment.

### **ONE BUNDLED PRICE**

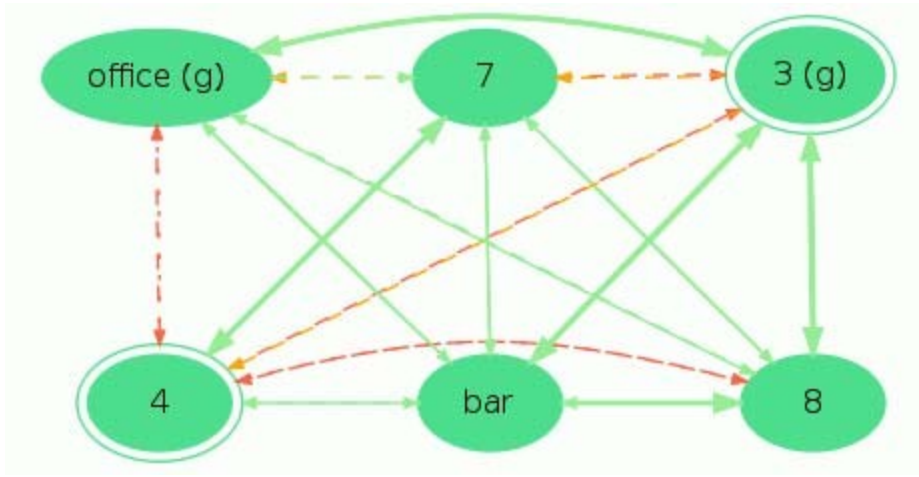

We are the only provider to combine all our services into one bundled price.... lowest rates Guaranteed!! It's simple: next generation Wireless system, installation, 24/7 toll free system and guest support, software and hardware upgrade for life, wired AND wireless rooms for an unbelievable \$2 per room / month

**STILL HAVE QUESTIONS? CALL US!**

## HOW IT WORKS

GCS uses zero-configuration mesh network technology creating a fast, secure, seamless wireless and wired mesh network that can service thousands of clients.

All you need is a high speed dsl or cable modem connection that we can plug in our master gateway router. Then we plug in small repeater routers evenly spaced throughout your property. These intelligent routers will automatically configure themselves to each other with multiple backup connections in case of a rare hardware failure. If one router goes down, the system just reroutes through a backup connection. Sounds simple- well it is!.....A typical install shouldn't take more than a couple hours.

| LETS COMPARE                | OTHERS              | GCS.HOTSPOT         |
|-----------------------------|---------------------|---------------------|
| Equipment and install       | Thousands           | FREE                |
| Guest support 24/7          | \$5 and up per room | \$2 INCLUDES WIRED! |
| Lifetime upgrades + repairs | \$100/hr and up     | FREE                |
| Contracts                   | Minimum 1 yr.       | NONE                |
